DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29 and 45-73, drawn to a method of treating, preventing or reducing the risk of developing a menopause disorder, classified in class 514, subclass 177, 178, 280, 400, and 284.
- II. Claims 30-44, drawn to a kit comprising a sex hormone binding globulin synthesis inhibiting agent and at least one of a non-orally deliverable steroid, classified in class 424, subclass 450-502, and 43-57.

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the products as cited can be used to treat erectile dysfunction secondary to hypogonadism.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.
